

DOT Security Awareness

DOT training comes in a variety of formats. The Department of Transportation, according to 172.704 (a)(1) states that training is required every three years, based on what your employees are doing. Training may include:

- ▶ (a)(1) general awareness
- ▶ (a)(3) familiarization
- ▶ (a)(4) security awareness
- ▶ (a)(5) security in depth

General Awareness & Chemical Safety training includes

- Being able to identify and recognize hazardous materials
- Determining methods to protect workers

Security Awareness training includes:

- Security risks with hazardous material transportation
- How to recognize and respond to possible security threats

Our training sessions are provided in a 4-hour format. We can add function specific training to include: paperwork, blocking and bracing, understanding the regulations, loading and unloading, inspections, package selection, hazardous waste shipments, and tank car inspections.
