Electrical Safety with NFPA 70E

Electrical safety has always been a major concern of OSHA with respect to general industry and construction. With OSHA laws and adopted consensus standards, individuals can work safely on electrical equipment by following today's safeguards and recommended work practices. STEP offers basic, practical electrical safety training courses that include the most up-to-date information regarding 29 CFR 1910 Subpart S and 29 CFR 1926 Subpart K, the Electrical Standard as well as NFPA 70E Electrical Safety in the Workplace.

Training can be conducted at your jobsite or at a designated location offsite. We offer a standardized training program for Authorized, Affected, Qualified and Unqualified, and general electrical safety awareness.

If you need something more specific, we can customize a training program to meet your needs. Contact us today for more information.

STEP...up to compliance!
