

First Aid, CPR & AED

American Red Cross first aid, CPR and AED programs are designed to give you the confidence to respond in an emergency with skills that can save a life. Additional training in bloodborne pathogens can be added to CPR and first aid training to prepare you for additional hazards.

Our instructors understand industry issues and work with participants to ensure that the skills you walk away with during this training are usable. Whether you assist during an emergency, are a professional rescuer or have been designated as the first aid provider, our instructors provide tools that allow you to help during a life threatening emergency.

Training is second nature to us. We take the American Red Cross course; developed by experts and provide our "twist" of hands-on interactive training to make this one of the best courses your employees will attend. From first aid, CPR and automated external defibrillator training, our course include the most up-to-date techniques and information.

STEP...up to compliance!
